ENNOV COMPLIANCE SUITE

Ennov Training Management Software

AI-powered and purpose-built, this eLearning solution helps HR and Managers efficiently manage training, ensure compliance, evaluate staff, and maintain inspection-ready records with minimal effort.

The Corporate Training Challenge

Managing the training requirements required for compliance with your quality standards can be labor intensive and time consuming work.

A fully integrated electronic Learning Management System can greatly simplify the planning, execution and management of your training program through automation and the elimination of paperwork and manual administrative tasks.

Stay Compliant and Audit Ready

Automate the training of staff on corporate policies and procedures and keep your training records up-to-date and inspection ready with Ennov Training. Follow the progress of each employee as they work through their assigned curriculum and always know who is on schedule or lagging behind.

Manage the required training curricula by profile or function within your organization and designate the sessions or modules relevant to each person or role. Accelerate and monitor the on-boarding of new employees through tailored learning programs.

Each curriculum can include documents, presentations, videos or other digital assets and can be assigned to groups or individuals. Ensuring the curricula are aligned with internal corporate guidelines and policies is key to maintaining compliance with your quality standards and an important factor in maximizing both individual and corporate performance.

Automatically trigger eLearning workflows following the versioning of documents to expedite the training process. Leverage built-in tracking reports to assess each department's performance and the progress being made against the training plan.

› CORE CAPABILITIES

Create and manage online training programs

Customize curricula by employee profile or role

Define personnel skill inventories

Training record management and archival

Online proficiency assessment tools

Real time monitoring of training progress

Email notifications and training alerts

› KEY FEATURES

Intrinsically connected with Ennov Doc and Ennov Process

Fully electronic, paperless record keeping

Robust scheduling and progress tracking

Integrated learning dashboard

Pre-configured for common quality processes

Intuitive user interface

21 CFR Part 11 compliant

Embedded AI agent

**Cloud Based or On Premises**   **Multi-Platform**   **ISO ISO 9001:2015 Certified**

Validate Prior Learning

Have confidence that your employees' professional skills have been verified and comply with your quality standards and industry best practices (e.g. ISO, GxP). Ennov Training's intuitive interface is designed for both the users and administrators and help automate and fast-track the learning process. Specify how each person's training is verified using a basic "read and understood" process or a more sophisticated proficiency assessment complete with a multiple choice questionnaire. Automated reports verify that all personnel have been properly trained make audits and inspections far less stressful.
