ENNOV REGULATORY SUITE

Ennov Artwork
Artwork Management Software

A Holistic Perspective on Artwork Management: Content, Validation, and Compliance

- Reduces errors and accelerates time to market
- Centralized management of artwork files
- Advanced versioning and proofing tools
- Seamless integration with other Ennov Core Models
- 100% web-based, ready-to-use, and user-friendly

The Artwork Challenge

Printed packaging materials in the life sciences industry present numerous challenges. Companies face tight timelines and project management pressures while needing to collaborate efficiently among stakeholders. Ensuring compliance and minimizing errors is critical due to the complexity of approval workflows, resource management, and feedback loops. Fragmented handling of artwork files and versions often leads to disorganization, frequent errors, and delayed market launches. Organizations need a streamlined, compliant, and collaborative approach to manage their artwork processes effectively.

Centralized Artwork Management for Maximum Efficiency

Ennov Artwork offers a powerful set of tools focused on content management, allowing content to be itemized, annotated, proofed, commented, and compared down to the pixel. Changes between versions can be clearly identified, and interaction with graphical content is intuitive. By integrating advanced versioning, proofing, annotation, and signature tools, Ennov Artwork ensures that all stakeholders work on the most current files, reducing the risk of errors. The platform is pre-configured, ready-to-use, and user-friendly, enhancing productivity and user adoption.

Ennov Artwork streamlines the entire lifecycle of artwork, from initial requests to final approvals, ensuring full traceability and compliance with regulatory standards such as 21 CFR Part 11 and EU GMP Annex 11. Automated workflows and intelligent tools facilitate efficient project management, reducing time to market. Seamless integration with other Ennov Core Models provides a unified repository for Regulatory, Submission, Quality, and Supply data, enhancing overall data integrity and consistency.

> CORE CAPABILITIES

Configurable templates for global regulatory standard

Life sciences expert solution offering full compliance

Integrated platform for seamless data management

Comprehensive audit trail for all regulatory activities

> KEY FEATURES

Dynamic artwork file with metadata

Artwork proofing and comparison

Intuitive user interface for easy search and use

Automated notifications for regulatory milestones

Automated workflows for compliance management

Electronic signature and SSO

100% web-based

| Cloud Based or On Premises | Multi-Platform | ISO 9001 and 27001 Certified |

Boost Productivity and Streamline Operations

Ennov Artwork's intuitive user interface and efficient search capabilities allow employees to quickly locate and access required documents. The platform provides instant access to documents, reducing the need for repeated downloads and ensuring that teams work on the most current files. Integrated document templates, robust revision management, automatic document naming and numbering, and electronic signature functionalities ensure artwork files are created on time and adhere to regulatory standards.

Empower Multiple Business Processes with a Unified Solution

Ennov Artwork supports a wide variety of artwork projects, including new product launches, rebranding, and regulatory updates. Its high degree of configurability and seamless integration with Ennov's other core models provides a comprehensive toolset for operational excellence. Ennov Artwork fully complies with FDA's 21 CFR Part 11 requirements (electronic signature, audit trail, records management), making it ideal for regulated industries such as pharmaceutical, biotechnology, animal health, and medical devices.

Why Choose Ennov?

HUNDREDS OF COMPANIES TRUST ENNOV	PROVIDING YOU FREEDOM OF CHOICE
Over 25 years' experience, and 450+ Life Science customers, with many more in other industries.	**Available as cloud-based or on-premises deployment:** You can switch between deployment options at any time.
Modern architecture and user interface: 100% web-based. Highly scalable. User-centric design.	**We make you autonomous:** System configuration and management require no IT skills.
Our commitment to your success: Very high customer satisfaction. 98.5% of projects delivered on time and within budget.	**Improved security and optimized performance:** Data is hosted locally for total flexibility. Single tenancy minimizes business interruptions.

Learn more about our unified content and information management platform to support the entire Life Sciences product development continuum at **www.ennov.com**

QUALITY
Our comprehensive QMS improves operational efficiency and ensures regulatory compliance

CLINICAL
Our total solution for capturing and managing Clinical Trial information streamlines clinical operations

REGULATORY
Our world-class Regulatory content and information management software accelerates HA approvals

PHARMACOVIGILANCE
Our end-to-end solution for collecting, reporting and analyzing human and vet PV data minimizes risk

COMMERCIAL
Our complete management of professional events ensures DMOS, EFPIA, HCP and COI compliance
